Source-blocked evaluation
all statistics rebuilt within each training fold
Historical formula with observed materials
91 formulas
6 work groups
Training-fold conditional graph
$P(m_j \mid m_i)$
Bayesian inclusion decoder
$p(y_j = 1 \mid x)$
Count and ratio posteriors
$K,\ \mathbf{w} \in \Delta^{M-1}$
Ranked completion
materials
ratios
intervals
Two unseen works per primary fold • five deterministic masks • one quarantined confirmation work
